## Московский Авиационный Институт

(Национальный Исследовательский Университет)

Факультет информационных технологий и прикладной математики Кафедра вычислительной математики и программирования

> Лабораторная работа №1 по курсу «Операционные системы»

Тема работы

"Использование утилиты strace"

Студент: Зубко Дмитрий Валерьевич
Группа: М8О-208Б-20
Вариант: -
Преподаватель: Миронов Евгений Сергеевич
Оценка:
Дата:
Полпись:

## Содержание

- 1. Репозиторий
- 2. Постановка задачи
- 3. Демонстрация работы с утилитой strace и подробное объяснение каждого системного вызова
- 4. Выводы

## Репозиторий

https://github.com/usernameMAI

#### Постановка задачи

Задача: подробно рассказать о каждом системном вызове, отображенном утилитой strace. Разбор системных вызовов осуществляется на примере четвертой лабораторной работы курса "Операционные системы".

# Демонстрация работы с утилитой strace и подробное объяснение каждого системного вызова

### Исходный код strace:

```
execve("./main1", ["./main1"], 0x7ffdf5c53b50 /* 22 \text{ vars }*/) = 0

read(0, "", 1024) = 0

exit_group(0) = ?

+++ exited with 0 +++
```

## Разберем подробнее:

**execve()** – запускает программу, при ошибке возвращает -1.

**brk()** – устанавливает значение конца сегмента данных в NULL

**arch\_prtcl()** – устанавливает специфичное для данной архитектуры состояние процесса или потока.

access() – проверяет права доступа к файлу, возвращает -1 при неуспехе

**openat**() — открывает файл, возвращает в качестве возвращаемого значения файловый дескриптор, иначе -1

**read()** – считывает из файлового дескриптора, возвращает количество считанных байтов

**fstat()** – возвращает информацию о файле

**mmap()** – отображает файл на память

**close()** – закрывает файловый дескриптор

**getcwd()** – копирует абсолютный путь к текущему рабочему каталогу в массиве

mprotect() – контролирует доступ к памяти

**pread64**() – читает с файлового дескриптора

**munmup**() – отображает память, отведенную для отображения файла

### Выводы

Благодаря данной лабораторной работе я узнал о утилите strace. Её использование может быть очень полезным, потому что можно напрямую из консоли узнать, как работает программа и как она реагирует на команды. На примере конкретного задания я разобрался с выводом утилиты.
